Life In Christ Lutheran Church
Jason Mesenbring, Church President

June 30, 2023

Dear Jay,

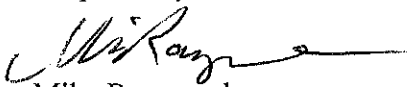

The Life In Christ Master Planning Committee respectfully proposes the following findings and recommendations for the voters to consider towards future plans for the church property. A summary of the committee's work and recommendations is outlined below.

The Master Planning Committee has accomplished the following over the past year in its objective to discover and plan the best use for the church property.

- 1) A property survey was completed and paid for. The survey shows existing structures, elevations, wetlands and septic fields. This survey can be utilized for future development of the property. It also exposed a small encroachment by the neighboring property that can be addressed.
- 2) A church member survey was distributed to help focus our priorities and future development, and gather ideas on what a future church building could look like and how it may be laid out. This has helped to size and situate a new church on the property, since this building anchors much of the future use of the property.
- 3) Infrastructure requirements and costs were researched. The Committee found that the cost to hook into city water and sewer is cost prohibitive due to the distance that new lines will need to be run (about a quarter mile with a cost of many hundreds of thousands of dollars). The existing septic system was confirmed to be adequate, but will need to be inspected when a building permit is pulled for any future work. The other mound system next to the parsonage is no longer in use. It can be removed. It cannot be put back into service.
- 4) Funding options for future development of the property were investigated. Synod financing is possible. Other financing options exist. A Synod Retreat, or conference center were ideas that the committee investigated and found that there are many obstacles to these potential uses of the property. However, there are adequate sites for future projects of this kind.

With all of these items covered the Committee has come up with the following plan for future use of the property. See attached survey with labeled sites.

Respectfully,

Mike Raymond,
Master Planning Committee Chair

Life In Christ Lutheran Church

Site Plan and Survey

See accompanying survey with recommended sites and uses.

New Church Site: Best visibility, access and ease of transition

Parking: Adjacent to the new church

Septic Area: Existing septic site (another site may be required in the future in another location)

Outdoor Worship: Adjacent to the new church, protected from road noise by the church

Parsonage and Garage: Existing Parsonage location, old garage and storage shed should be removed and new garage and church storage constructed at some point

Site "A": Good location for future RV camping with new driveway access

Site "B": Good camping sites or future cemetery/memorial garden

Site "C": Best site for future endeavors like school, conference center, campground or other ideas.

NOTES: Any of sites A, B or C have multiple uses. If land to the north were ever purchased an access would need to be provided and determined based upon wetland impacts. All areas lying in and around the listed sites can be used for walking paths, gardens or other ideas, they are generally not suitable for building due to wetlands.
